About us

Limtech Business Consultants is an ICT company that delivers practical and cost-effective solutions to both the private and public sectors.

Founded in 2010 and is 100% black owned and managed by dedicated black entrepreneurs. We offer ICT consultancy services always keeping our clients abreast with the current trends and helping in realizing all available ICT opportunities for business growth and stability.

Our approaches are business oriented and our core goal is to provide sustainable ICT solutions to the business society.

Limtech Business Consultants has helped clients of all sizes across an array of industries understand and implement technology solutions that improve processes and helps business grow. Our team has the technical and business expertise to help you realize the maximum value from your IT investments.

Our Mission

Make technology an asset for businesses not a problem. We strive to make technology integrate seamlessly with your business so that it can grow. As your technology partner, when your business grows ours grows too, therefore, we will work hand in hand with you to support your growth.

Our Vision

Be recognized worldwide as a provider of leading solutions in enterprise excellent and compliance.

WHO WE ARE | WHAT WE DO | HOW WE DO IT

Who We Are

We are a full service IT and business consultancy with unparalleled expertise in the development of business technology solutions. We deliver a range of unbiased, integrated solutions that brings our clients every competitive advantage possible.

What We Do

We help you design, select, implement, and scale all aspects of technology, using our comprehensive solutions portfolio. Our goal is to be considered an integral part of your business; utilising promising new technologies to attribute to your success and maximize your total return on investment.

How we do it

We have the most talented team of individuals, who work together to provide a 360 view of your business needs today, while providing an IT roadmap for your future. Our partnerships with the biggest names in technology ensure an unbiased approach, matching you with the best solutions for your needs.

Our Consulting Services:

Our team of experts are positioned and ready to provide your company with high-impact consulting services. Our solutions are aimed at improving efficiency and effectiveness at every level of your organization. Through many years of experience, we've created the most concise and practical consulting methodology available and we are ready to work with you.

Working with Limtech is easy. From your first call to us, we make you feel welcome and part of our company, which you are. We also take the time to understand your goals and objectives before making a recommendation. During a project, we work rapidly, but we don't rush and we don't move forward without being certain of the next step.

We begin with a free in-depth consultation to personalize our services to your unique company needs.

Our services include:

1. Enterprise Content Management

First and foremost, the SharePoint system is about effective content management. With the way that records, documents, presentations, and other forms of data multiply from year to year, it's crucial that the information be organized correctly.

Regardless of the size of your organization, appropriate content management is one of the greatest keys to maximizing efficiency, ensuring accurate information, simplifying communication, and increasing profits.

For all groups, we provide:

Effective management of diverse content.

We can help in creating a centrally managed repository with integrated search capabilities. This secure interface will help all members of your organization find and share information comfortably and quickly.

Management solutions for multiple websites.

We can provide you with website publishing systems that enable you to take control of your own website publishing, increasing update speed and lowering IT costs.

Compliance-ready records management.

The integrated records management solution provided by Limtech allows you to store and protect your business records in a form that meets all compliance and legal requirements.

For enterprise-scale groups, we can create one integrated platform that allows you to manage all company content regardless of your organization's size. This can include content and data from vendors, suppliers, your public site, your primary Intranet, and more. These Enterprise Content Management (ECM) solutions are developed using the proprietary SOS framework to reduce the cost of development.

2. SharePoint Customization

No two companies are identical, and thus, no two solutions should be the same. That's why we work to create customized solutions that specifically address the needs of your company. We customize both the front-end presentation, improving ease of access and usability, and modify the back-end infrastructure, improving the core functionality of your company's SharePoint components.

By customizing the powerful SharePoint tool, you can tap into the real potential of this powerful platform. By using our years of industry experience and in-depth knowledge about the product, we can guide you through innumerable customization options, allowing you to adapt the program fully to your organization's needs.

We can assist in customizing:

- Business Workflows
- Business Intelligence Dashboards
- Core Content Management Systems
- Data Collaboration Solutions
- Excel Services
- Integration Tools
- Intranet / Extranet Portals
- Third Party Collaboration Tools

3. Business Process & Workflow Solutions

Any improvement to the business process of your company can mean a major increase in overall efficiency and, therefore, profitability. Let the Limtech team help you address your core business objectives more effectively with business process solutions.

Our business process management (BPM) is centered around creating structured activities within your company, such as those found in SharePoint Workflow, that both standardize and maximize the efforts of your employees.

We can help you:

- Prioritize and streamline the core processes that drive your business.
- Effectively manage the compliance needs for various regulatory processes.
- Create reusable process templates that increase employee independence and lower IT costs.
- Increase communication and collaborative effectiveness in inter-departmental efforts.
- Improve employee and C-level decision making through business intelligence tools.
- Manage overall company workload through an effective pipeline reporting system.
- Integration Tools
- Intranet / Extranet Portals
- Third Party Collaboration Tools

4. SharePoint Implementation and Integration

Our years of expertise will make this often arduous task more simple and fast, and will prevent costly errors that sometimes arise during self-implementation.

Our SharePoint implementation team can help you:

- Migrate/upgrade from existing legacy applications.
- Install/configure Microsoft Office SharePoint Server (MOSS).
- Install/configure Windows SharePoint Services (WSS).
- Create custom business workflows.
- Intranet/Extranet web sites.
- Setup SQL server reporting (SRS), integration (SSIS), and analysis (SSAS).
- Create dashboards and data reporting utilities.
- Create InfoPath forms.
- Brand your company SharePoint.
- Implement Business Process Automation

5. SharePoint Intranet / Extranet Portals

Once you have your data organized with appropriate content management solutions and reporting tools, you need to make sure the information is accessible. This is best done through a secure Intranet and/or Extranet portal. However, the setup process for either of these solutions can be both challenging and complex.

Limtech can help your company smoothly set up a portal that works as an easy to use data repository for information, documents, and more. From there, you can grant access to anyone from employees to shareholders and more while simultaneously maintaining internal control over the data.

These SharePoint Server portals are both secure and highly scalable, with an architecture that can both expand to meet your company needs while functioning under the level of security you deem appropriate. Additionally, with the help of Limtech, it is easy to integrate a SharePoint portal with the business applications you use on a daily basis.

6. SharePoint Business Intelligence Solutions

Nothing is more crucial to the long term success of your business than appropriate decision making. With SharePoint business intelligence solutions, you can make those decisions more informed at every level.

We can help you create:

Highly intelligent reporting. By providing great precision and scalability, we help you get critical information quickly.

Rich business intelligence dashboards. These dashboards present visual tools, including charts, graphs, and summaries, that let you get the data you need at a glance.

Well-structured excel reporting. Our Excel services let you add spreadsheets and workbooks to your dashboard, share your sheets via web or network, and provides an intuitive web-based UI with a customizable API.

7. SharePoint Excel Solutions & Services

Excel is a powerful utility on its own, but when you combine it with the framework of the SharePoint platform, the possibilities are endless. The user-friendly Excel Services technology allows you to use, secure, and share your Excel sheets and workbooks. However, the real power of the utility isn't tapped until you go beyond the installation configuration.

With appropriate setup, SharePoint Excel Services lets you make all of your workbooks and documents into interactive reports, create workbooks that are accessible from anywhere on your network, synchronize or stream data to external repositories, and more.

8. Cloud Backup and Disaster Recovery Solution

Limtech's Cloud Backup is an award-winning technology from a global pioneer in secure Cloud backup. Protecting millions of digital lives since 2001, this is truly a technology that you can trust; offering you a complete backup solution – not just a piecemeal plan – starting with Unlimited backup of PCs, Macs, iOS, and Android devices. This allows for:
